GDPR03 - Data Security and Data Retention Policy and Procedure

1. Purpose

1.1 The purpose of this policy is to ensure that High Street Surgery and all its staff understand the principles set out in GDPR in relation to data retention and data security.

1.2 By reviewing this policy, High Street Surgery will be able to consider appropriate retention periods for the personal data it processes.

1.3 This policy will enable High Street Surgery and all staff working at High Street Surgery to review the policies and procedures they have in place to ensure that personal data they process is kept secure and properly protected from unlawful or unauthorised processing and accidental loss, destruction or damage.

1.4 To support High Street Surgery in meeting the following Key Lines of Enquiry:

Key Question	Key Line of Enquiry (KLOE)
WELL-LED	HW4: Are there clear responsibilities, roles and systems of accountability to support good governance and management?
WELL-LED	HW5: Are there clear and effective processes for managing risks, issues and performance?

1.5 To meet the legal requirements of the regulated activities that High Street Surgery is registered to provide:

- General Data Protection Regulation 2016
- Data Protection Bill 2017

2. Scope

2.1 The following roles may be affected by this policy:

- All staff

2.2 The following people may be affected by this policy:

- Patients

2.3 The following stakeholders may be affected by this policy:

- Family
- Advocates
- Representatives
- Commissioners
- External health professionals
- Local Authority
- NHS

3. Objectives

3.1 The objective of this policy is to enable High Street Surgery to determine whether its data retention and data security policies are GDPR compliant and, if not, to update them prior to 25 May 2018.

3.2 This policy will assist with defining accountability and establishing ways of working in terms of the use, storage, retention and security of personal data.

GDPR03 - Data Security and Data Retention Policy and Procedure

4. Policy

4.1 Data Retention

As a general principle, High Street Surgery will not keep (or otherwise process) any personal data for longer than is necessary. If High Street Surgery no longer requires the personal data once it has finished using it for the purposes for which it was obtained, it will delete the personal data.

4.2 High Street Surgery may have legitimate business reasons to retain the personal data for a longer period. This may include, for example, retaining personnel records in case a claim arises relating to personal injury caused by High Street Surgery that does not become apparent until a future date. High Street Surgery should consider the likelihood of this arising when it determines its retention periods - the extent to which medical treatment is provided by High Street Surgery will, for example, affect the likelihood of High Street Surgery needing to rely on records at a later date.

4.3 High Street Surgery may be required to retain personal data for a specified period of time to comply with legal or statutory requirements. These may include, for example, requirements imposed by HMRC in respect of financial documents, or guidance issued by the Home Office in respect of the retention of right to work documentation (see "Underpinning Knowledge" section).

4.4 High Street Surgery understands that claims may be made under a contract for 6 years from the date of termination of the contract, and that claims may be made under a deed for a period of 12 years from the date of termination of the deed. High Street Surgery may therefore consider keeping contracts and deeds and documents and correspondence relevant to those contracts and deeds for the duration of the contract or deed plus 6 and 12 years respectively.

4.5 High Street Surgery will consider how long it needs to retain HR records. High Street Surgery may choose to separate its HR records into different categories of personal data (for example, health and medical information, holiday and absence records, next of kin information, emergency contact details, financial information) and specify different retention periods for each category of personal data. High Street Surgery recognises that determining separate retention periods for each element of personal data may be more likely to comply with GDPR.

High Street Surgery may decide, however, that separating its HR records into different elements is not practical, and that it can determine a sensible period of time for which to keep the HR records in their entirety. The period of time that is appropriate may depend on the likelihood of a claim arising in respect of that employee in the future. If, for example, High Street Surgery is concerned that an employee may suffer personal injury as a result of its employment with High Street Surgery, High Street Surgery may choose to retain its HR records for a significant period of time. If any such claim is unlikely, High Street Surgery may choose to retain its files for 6 or 12 years (depending on whether the arrangement entered into between High Street Surgery and the employee is a contract or a deed).

4.6 High Street Surgery will consider for how long it is required to keep records relating to Patients. In doing so, High Street Surgery will consider the data retention guidelines provided by the NHS, if applicable. Those guidelines can be accessed by using the link in the "Further Reading" section.

If the NHS guidelines don't apply to High Street Surgery, High Street Surgery will determine an appropriate retention policy for Patient personal data. High Street Surgery may choose to retain personal data for at least 6 years from the end of the provision of services to the Patient, in case a claim arises in respect of the services provided.

4.7 Irrespective of the retention periods chosen by High Street Surgery, High Street Surgery will ensure that all personal data is kept properly secure and protected for the period in which it is held by High Street Surgery. This applies in particular to special categories of data.

4.8 High Street Surgery will record all decisions taken in respect of the retention of personal data. High Street Surgery recognises that if the ICO investigates High Street Surgery's policies and procedures, a written record of the logic and reasoning behind the retention periods adopted by High Street Surgery will assist High Street Surgery's position.

4.9 High Street Surgery will implement processes for effectively destroying and/or deleting personal data at the end of the relevant retention period. High Street Surgery will consider whether personal data stored on computers, including in emails, is automatically backed up and how to achieve deletion of those backups or

GDPR03 - Data Security and Data Retention Policy and Procedure

ensure that the archived personal data is automatically deleted after a certain period of time. High Street Surgery will consider circulating guidance internally to encourage staff to regularly delete their emails.

High Street Surgery will introduce policies relating to the destruction of hard copies of documents, including by placing the documents in confidential waste bins or shredding them.

4.10 Data Security

High Street Surgery will take steps to ensure the personal data it processes is secure, including by protecting the personal data against unauthorised or unlawful processing and against accidental loss, destruction or damage.

4.11 High Street Surgery understands that all health and care organisations, as detailed below, are required to comply with the Information Governance Toolkit (the "IG Toolkit"). The IG Toolkit will be replaced from April 2018 with the new Data Security and Protection Toolkit. A link to an explanatory guidance note is included in the "Underpinning Knowledge" section. Compliance with the IG Toolkit and the Data Security and Protection Toolkit will facilitate compliance with GDPR.

High Street Surgery understands that the following types of organisation must comply with the Data Security and Protection Toolkit:

- Organisations contracted to provide services under the NHS Standard Contract
- Clinical Commissioning Groups
- General Practices that are contracted to provide primary care essential services
- Local authorities and social care providers must take a proportionate response to the new toolkit:
 - Local authorities should comply with the toolkit where they provide adult social care or public health and other services that receive services and data from NHS Digital, or are involved in data sharing across health and care where they process confidential personal data of Patients who access health and adult social care services
 - Social care providers who provide care through the NHS Standard Contract should comply with the toolkit. It is also recommended that social care providers who do not provide care through the NHS Standard Contract consider compliance with the new toolkit from April 2018, which will help to demonstrate compliance with the ten security standards and GDPR

4.12 High Street Surgery will implement and embed the use of policies and procedures to ensure personal data is kept secure. The suggestions below apply in addition to the steps High Street Surgery is required to take pursuant to the IG Toolkit and the new Data Security and Protection Toolkit, if the toolkits apply to High Street Surgery.

For paper documents, these will include, where possible:

- Keeping the personal data in a locked filing cabinet or locked drawer when it is not in use
- Adopting a "clear desk" policy to ensure that personal data is not visible or easily retrieved
- Ensuring that documents containing personal data are accessible only by those who need to know/review the documents and the personal data contained within them
- Redacting personal data from documents where possible
- Ensuring documents containing personal data are placed in confidential waste bins or shredded at the end of the relevant retention period

For electronic documents, the measures taken by High Street Surgery will include, where possible:

- Password protection or, where possible, encryption
- Ensuring documents containing personal data are accessible only by those who need to know/review the documents and the personal data contained within them
- Ensuring ongoing confidentiality, integrity and reliability of systems used online to process personal data (this may require a review of IT systems and software currently used by High Street Surgery)
- The ability to quickly restore the availability of and access to personal data in the event of a technical incident (this may require a review of IT systems and software currently used by High Street Surgery)
- Taking care when transferring documents to a third party, ensuring that the transfer is secure and the documents are sent to the correct recipients

High Street Surgery will ensure that all business phones, computers, laptops and tablets are password protected.

High Street Surgery will encourage staff to avoid, storing personal data on portable media such as USB devices.

GDPR03 - Data Security and Data Retention Policy and Procedure

If the use of portable media can't be avoided, High Street Surgery will ensure that the devices it uses are encrypted or password protected and that each document on the device is encrypted or password protected.

4.13 High Street Surgery will implement guidance relating to the use of business phones and messaging apps. High Street Surgery understands that all personal data sent via business phones, computers, laptops and tablets may be captured by GDPR, depending on the content and context of the message. As a general rule, High Street Surgery will ensure that staff members only send personal data by text or another messaging service if they are comfortable that the content of the messages may be captured by GDPR and may be provided pursuant to a Subject Access Request (which will be explained in more detail in a future policy).

4.14 High Street Surgery will ensure that all staff are aware of the importance of keeping personal data secure and not disclosing it on purpose or accidentally to anybody who should not have access to the information. High Street Surgery will provide training to staff if necessary. High Street Surgery will consider in particular, the likelihood that personal data, including special categories of data, will be removed from High Street Surgery's premises and taken to, for example, Patients' homes and residences. High Street Surgery will ensure that all staff understand the importance of maintaining the confidentiality of personal data away from High Street Surgery's premises and take care to ensure that the personal data is not left anywhere it could be viewed by a person who should not have access to that personal data.

4.15 High Street Surgery will adopt policies and procedures in respect of recognising, resolving and reporting security incidents including breaches of GDPR. High Street Surgery understands that it may need to report breaches to the ICO and to affected Data Subjects, as well as to CareCERT if High Street Surgery is required to comply with the IG Toolkit and the new Data Security and Protection Toolkit.

4.16 High Street Surgery will adopt processes to regularly test, assess and evaluate the security measures it has in place for all types of personal data.

4.17 Privacy By Design

High Street Surgery will take into account the GDPR requirements around privacy by design, particularly in terms of data security.

4.18 High Street Surgery understands that privacy by design is an approach set out in GDPR that promotes compliance with privacy and data protection from the beginning of a project. High Street Surgery will ensure that data protection and GDPR compliance is always at the forefront of the services it provides, and that it won't be treated as an afterthought.

4.19 High Street Surgery will comply with privacy by design requirements by, for example:

- Identifying potential data protection and security issues at an early stage in any project or process, and addressing those issues early on; and
- Increasing awareness of privacy and data protection across High Street Surgery, including in terms of updated policies and procedures adopted by High Street Surgery

4.20 High Street Surgery will conduct Privacy Impact Assessments to identify and reduce the privacy and security risks of any project or processing carried out by High Street Surgery. A template Privacy Impact Assessment will be provided in a future policy.

GDPR03 - Data Security and Data Retention Policy and Procedure

5. Procedure

5.1 High Street Surgery will consider data retention and data security issues and concerns at the beginning of any project (whether the project is the introduction of a new IT system, a new way of working, the processing of a new type of personal data or anything else that may affect High Street Surgery's processing activities). High Street Surgery appreciates that this is key for complying with the privacy by design requirements in GDPR.

5.2 High Street Surgery will review the periods for which it retains all the personal data that it processes.

5.3 High Street Surgery will, if necessary, adopt new policies and procedures in respect of data retention and will circulate those policies and procedures to all staff. High Street Surgery will consider providing training to staff in respect of data retention.

5.4 High Street Surgery will review the security measures currently in place in respect of all the personal data it processes.

5.5 High Street Surgery will document the decisions it takes, and the logic and reasoning behind those decisions, in respect of both data retention and data security. High Street Surgery will keep a record of all policies and procedures it implements to improve its compliance with GDPR.

6. Definitions

6.1 CareCERT

- The Care Computing Emergency Response Team, developed by NHS Digital. CareCERT offers advice and guidance to support health and social care organisations to respond to cyber security threats

6.2 Data Subject

- The individual about whom High Street Surgery has collected personal data

6.3 Data Protection Act 1998 or DPA

- The law that relates to data protection in the UK. It will remain in force until and including 24 May 2018. It will be replaced by GDPR on 25 May 2018

6.4 GDPR

- The General Data Protection Regulation 2016. It will replace the Data Protection Act 1998 from 25 May 2018 as the law that governs data protection in the UK. It will come into force in the UK via the Data Protection Bill 2017

6.5 Personal Data

- Any information about a living person including but not limited to names, email addresses, postal addresses, job roles, photographs, CCTV and special categories of data, defined below

6.6 Process or Processing

- Doing anything with personal data, including but not limited to collecting, storing, holding, using, amending or transferring it. You do not need to be doing anything actively with the personal data - at the point you collect it, you are processing it

6.7 Special Categories of Data

- Has an equivalent meaning to "Sensitive Personal Data" under the Data Protection Act 1998. Special categories of data include but are not limited to medical and health records (including information collected as a result of providing health care services) and information about a person's religious beliefs, ethnic origin and race, sexual orientation and political views

GDPR03 - Data Security and Data Retention Policy and Procedure

Key Facts - Professionals

Professionals providing this service should be aware of the following:

- Anybody who processes personal data on behalf of High Street Surgery should be made aware of and should comply with High Street Surgery's policies in respect of data retention and data security

Key Facts - People Affected by The Service

People affected by this service should be aware of the following:

- High Street Surgery will implement and embed the use of policies and procedures to ensure that all personal data processed about people affected by the services provided by High Street Surgery, including Patients, is retained and is kept secure and protected in accordance with GDPR

Further Reading

There is no further reading for this policy, but we recommend the 'Underpinning Knowledge' section of the review sheet to increase your knowledge and understanding.

Outstanding Practice

To be 'outstanding' in this policy area you could provide evidence that:

- You have considered the personal data you process and adopted and documented appropriate retention periods for each type of personal data
- You have reviewed the security measures in place in respect of the personal data High Street Surgery processes and have determined whether those measures need updating. If further steps need to be taken to improve security, you have a plan in place to take those steps prior to 25 May 2018
- You have reviewed and considered the documents and guidance referenced in the "Underpinning Knowledge" and "Further Reading" sections
- The wide understanding of the policy is enabled by proactive use of the QCS App
